The single intuitive interface of Sage BusinessVision provides instant access to detailed information exactly when you need it.

Delivering incredible performance at an economical price, Sage BusinessVision 50 Accounting - Limited Edition is ideal for smaller businesses.

Designed primarily for new businesses or those that need to upgrade their current entry level accounting system, the single-user Sage BusinessVision - Limited Edition offers affordable access to some of the most powerful tools on the market.

The Right Solution for Your Business

Sage BusinessVision business management and accounting systems are easy to learn, easy to use, and yet powerful enough to provide you with the sophisticated processing and management functions you need to compete in today's business world.

The intuitive interface of Sage BusinessVision - Limited Edition puts all the information you need right at your fingertips. For example, you can review the complete picture of a customer, including open sales orders; sales order history; comparative sales per period for this year and last year; and past and outstanding accounts receivable transactions—all from one single module.

Sage BusinessVision - Limited Edition helps you to manage your receivables, payables, orders, sales, purchases, jobs, general ledger, and payroll. Sage BusinessVision - Limited Edition manages most of your daily accounting requirements automatically, so you don't need expert accounting or bookkeeping knowledge. For example, when the system processes an invoice, it automatically adjusts stock levels, sales statistics, sales and cost accounts, taxes, and accounts receivable.

The "batching" of transactions from one module to another is a thing of the past—and month-end-closes simply do not exist. Sage BusinessVision - Limited Edition eliminates the need to close one month before starting the next. The system posts transactions to the applicable period based on the date of the transaction or activity. Year-end processing is automatic, and you can continue to apply backdated transactions to the previous year, even after the year-end.

Sage BusinessVision

Sage BusinessVision 50 Accounting - Limited Edition

Real Time Business Information

With Sage BusinessVision - Limited Edition, you can view up-to-the-minute information at any time, helping you to make the right decisions for your business. Customers, vendors, orders, inventory, receivables, payables, job-cost, payroll, sales analysis, purchase analysis, and general ledger information is available to view on screen for the time period you desire—provided you have the appropriate access authority.

And with a reporting suite of over 190 pre-designed reports, forms and graphs, you'll know exactly how well your business is doing at any moment. With the built-in report designer, you can also create and modify your own forms and reports, and publish them in practically any format. Export your reports to Microsoft® Word and Excel, HTML, and even e-mail your clients their invoices and statements.

High Level Security

Protecting your data—one of your most valuable company assets—is of paramount importance in today's business world. Sage BusinessVision - Limited Edition provides full security features. Access codes and passwords prevent unauthorized access to sensitive business records, and authorization settings allow users limited or full access to your valuable business information.

Flexible

Customize your Sage BusinessVision solution in a number of ways. For example, you can print onto common business forms and you can adjust the terminology to suit your type of business. If, for example, you call a part number a "stock code", or a supplier account number a "vendor code", you simply adjust the terminology once and it then takes effect globally.

Expandable

The decision to power your business with the affordable Sage BusinessVision - Limited Edition leaves you free to expand as necessary. Sage BusinessVision - Limited Edition is designed to grow as you do. With four editions, from the single-user Limited Edition to the high-end, multi-user Client-Server Edition, and a seamless upgrade path throughout, Sage BusinessVision is the high performance business management and accounting system you'll never outgrow.

Seamless Integration

Seamlessly integrated with Microsoft Office, Sage BusinessVision - Limited Edition enables you to easily publish financial reports in Microsoft Word, analyze financial reports in Microsoft Excel, or populate a Microsoft Access database.

Sage BusinessVision also comes ready-enabled with a dynamic link to the popular ACT! by Sage contact management system. The ACT! by Sage database is updated immediately, whenever changes are made in Sage BusinessVision - Limited Edition, and vice versa, giving you a complete picture of your business from beginning to end.
